ODP 1432-76 20 JUL 1976

MEMORANDUM FOR: Chief, Plans Staff, DD/A

FROM : Clifford D. May, Jr.

Director of Data Processing

SUBJECT : Fighting Inflation and Reducing

Daily Operating Costs

REFERENCE: Memo fm DD/A (DD/A 76-2736), dtd 3 June 1976

Same Subject

1. Attached is our report on fighting inflation and reducing daily operating costs for fiscal year 1976.

2. In our report for the first half of the fiscal year we showed a one-time savings of \$10,274. Of this amount \$8,914 was for a reduction in the number of safes used. Because we have relocated people from secure areas to open areas we had to add safes for their classified data. This increase in the number of safes has offset the savings reported for the first half of fiscal year 1976.

CLIFFORD D(//MAY, JR.

Group III One Time Savings for FY 1976 Only

Description of Activity : FY 1976 Review of Archival Tapes The requirement for 1,049 archival magnetic tapes stored at reviewed with users. Following this review 260 tapes were removed from storage, degaussed, and put back in service. Since magnetic tapes cost \$10 each the savings for this re-use was \$2600. In future years we will save the annual cost for storing these tapes at \$175. \$2,600 \$ 175 Improvement in Computer Processing for OD&E Model	nual
The requirement for 1,049 archival magnetic tapes stored at reviewed with users. Following this review 260 tapes were removed from storage, degaussed, and put back in service. magnetic tapes stored at reviewed with users. Following this review 260 tapes were removed from storage, degaussed, and put back in service. Since magnetic tapes cost \$10 each the savings for this re-use was \$2600. In future years we will save the annual cost for storing these tapes at \$175. \$2,600 \$175 Improvement in Computer Processing for OD&E Model	
for OD&E Model	
\cdot	
The operating configuration for an OD&E model was changed to effect a 50% savings in elapsed time and a 10% savings in Central Processing Unit (CPU) time. This yielded an estimated savings of \$50,000 during FY-76 and in future years, assuming	
that use of the model will continue. 50,000 50,000

Group III
One Time Savings
for FY 1976 Only

Description of Activity :	Group I Savings to Date In FY 1976	Group II Projected Annual Savings Beyond FY 1976
Modification to Financial Resources System (FRS)		
The FRS computer system was modified to decrease by 80% the elapsed time to extract data to produce the Trend Reports. Estimated savings are \$30,000 per year.	5,000	30,000
Improved Operating Procedures for an OGCR Model		
Computer processing procedures for modeling the growing season were improved to give a 44% savings in the use of computer memory and an 80% savings in computer processing time.		20,000
